Financial Results

Unaudited interim results for the six months ended 31 December 2018

DIRECTORS' STATEMENT

The directors take pleasure in presenting the unaudited summarised interim results of MMI Holdings financial services group for the period ended 31 December 2018. The preparation of the group's results was supervised by the group finance director, Risto Ketola (FIA, FASSA, CFA).

Corporate events

As part of our plan to exit a number of African countries, we have classified three of these African entities, which we plan on exiting in the next 12 months, as held for sale.

Basis of preparation of financial information

These summarised consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS); International Accounting Standard 34 (IAS 34) – Interim financial reporting; the SAICA Financial Reporting Guide as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council; the JSE Listings Requirements and the South African Companies Act, 71 of 2008. The accounting policies applied in the preparation of these financial statements are in terms of IFRS and are consistent with those adopted in the previous years except as described below. Critical judgements and accounting estimates are disclosed in detail in the group's integrated report for the year ended 30 June 2018, including changes in estimates that are an integral part of the insurance business. The group is exposed to financial and insurance risks, details of which are also provided in the group's integrated report.

New and revised standards effective for the period ended 31 December 2018 and relevant to the group

- The following amendments to standards and interpretations became effective for the first time in the current period and had no impact on the group's earnings or net asset value: Amendments to IFRS 2 Share-based payments, IFRS 4 Insurance contracts, IAS 40 Investment property, and IFRIC 22 Foreign currency transactions and advance consideration. IFRS 9 Financial instruments and IFRS 15 Revenue from contracts with customers also became effective for the first time in the current period. The effect of these is described below.
- IFRS 15 Revenue from contracts with customers
 - IFRS 15 is effective from periods beginning on or after 1 January 2018. The group has implemented IFRS 15 on 1 July 2018, retrospectively without restating comparative figures.
 - IFRS 15 replaces all existing revenue requirements in IFRS and applies to all revenue arising from contracts with clients, unless the contracts are in the scope of the standards on leases, insurance contracts and financial instruments.
 - The core principle of the standard is that revenue recognised reflects the consideration to which the company expects to be entitled in exchange for the transfer of promised goods or services to the client. The standard incorporates a five-step analysis to determine the amount and timing of revenue recognition. The group has assessed the impact of the adoption of IFRS 15 to determine the impact on the opening balance and concluded that there was no significant impact for the group. The opening retained earnings as at 1 July 2018 has therefore not been adjusted for any change in revenue recognition.
- IFRS 9 Financial instruments
 - The group has implemented IFRS 9 retrospectively without restating comparative figures. Opening retained earnings as at 1 July 2018 has been adjusted for any differences in the carrying amounts of financial instruments.

The standard introduces an approach to the classification of financial instruments that is based on contractual cash flows characteristics and models through which financial instruments are managed (business model). The standard amends the previous requirements in three main areas: (a) classification and measurement of financial assets, (b) impairment of financial assets, mainly by introducing a forward-looking expected credit loss (ECL) impairment model and (c) hedge accounting including removing some of the restrictions on applying hedge accounting in IAS 39 Financial Instruments: Recognition and Measurement.

IFRS 9 contains three principal classification categories for financial assets:

- Measured at amortised cost
- Fair value through other comprehensive income
- Fair value through income

New and revised standards effective for the period ended 31 December 2018 and relevant to the group (continued)

IFRS 9 Financial instruments (continued)

Even though these measurement categories are similar to IAS 39, the criteria for classification into these categories are significantly different. The standard eliminates the existing IAS 39 categories of held-to-maturity, loans and receivables and available-for-sale.

No significant changes were introduced for the classification and measurement of financial liabilities, except for financial liabilities that are designated at fair value where entities will need to recognise the part of the fair value change that is due to changes in their own credit risk in other comprehensive income rather than profit or loss.

The standard has introduced a new ECL impairment model that will require more timely recognition of ECLs than under IAS 39. An impairment loss may now be recognised prior to a loss event occurring. This will require considerable judgement about how changes in economic factors affect ECLs, which will be determined on a probability-weighted basis.

The group has elected not to apply the general hedge accounting principles under IFRS 9 and will continue to apply IAS 39 hedge accounting, where applicable.

Impact on adoption of IFRS 9

Prior to the implementation of IFRS 9, the group designated a significant majority of its financial assets at fair value through income in terms of IAS 39. The application of the classification criteria resulted in the majority of the financial assets being classified mandatorily at fair value through income. In the life companies certain policyholder assets were designated at fair value through income due to accounting mismatch. All equity securities remain at fair value through income and assets previously disclosed as held-to-maturity will continue to be carried at amortised cost.

With majority of the group's financial assets measurement remaining at fair value through income these assets are not subjected to the new impairment model. The significant impacts from changes in the measurement basis of impairment provisions are limited to the group's assets that were previously classified as held-to-maturity and loans and receivables which are now classified and carried at amortised cost. The impact of applying the ECL model resulted in a decrease in equity of R40 million on 1 July 2018 which primarily relates to loans and receivables.

For the group's financial liabilities that are designated at fair value through income, there were no significant changes in its own credit risk to recognise in other comprehensive income.

The application of IFRS 9 impairment methodology had an insignificant impact on the group's equity accounted associates and joint ventures.

All insurance and reinsurance receivables are recognised in terms of IFRS 4 and will be included in the IFRS 17 assessment.

The effects of the adoption of IFRS 9 on the statement of financial position as at 1 July 2018 are shown in the financial instruments section.

• The International Accounting Standards Board (IASB) made amendments to various standards as part of their annual improvements project. These amendments had no impact on the group's earnings.

Segmental report

A simplified operating model was announced in June 2018, effective 1 July 2018. The product Centre of Excellence structure was dissolved and a number of empowered end-to-end value chain business units were created, supported by shared distribution channels and group support functions.

In order to align internal and external reporting to the new operating business unit structures, the reporting units have also changed. The prior periods have been restated to provide meaningful comparison for these new segments.

The group's reporting view now reflects the following segments:

Momentum Life: Momentum Life includes protection, savings and life insurance products focused on the middle and affluent client segments.

Momentum Investments: Momentum Investments consists of the Momentum Wealth platform business, local and offshore asset management operations, retail annuities and guaranteed investments, as well as Eris Properties.

Segmental report (continued)

Metropolitan Retail: Metropolitan Retail focusses on the lower and middle income retail market segment, with a range of protection and savings products.

Momentum Corporate: Momentum Corporate offers group risk, annuities, pension savings and umbrella fund (FundsAtWork) products and includes MMI Health.

Africa: This segment includes our African operations.

Non-life Insurance: Non-life Insurance comprises the retail general insurance offering, Momentum Short-term Insurance, and the cell captive insurer, Guardrisk.

New Initiatives: This includes India, aYo, Money Management, Lending, Exponential Ventures and Momentum Consult.

Shareholders: The Shareholders segment reflects investment income on capital held to support local operations and some costs not allocated to operating segments (eg certain holding company expenses).

Embedded Value information

New regulatory framework:

The new regulatory framework, as defined in the South African Insurance Act, 18 of 2017, became effective on 1 July 2018. This meant that the previous Statutory Valuation Method (SVM) was no longer recognised as a valid basis for regulatory liabilities. MMI covered businesses elected to adopt the IFRS liabilities as reference for determining the Value of In-force business for Embedded Value purposes. This has resulted in a reallocation of value between the Adjusted Net Worth and Value of In-force due to the liability difference between the previous statutory and IFRS liabilities.

MMIGL Required Capital is derived as the total Restricted Assets less the IFRS liabilities as per the new required capital methodology. Restricted Assets were defined in terms of the new regulatory balance sheet as the assets allocated to support the policyholder liabilities and internal capital requirements.

Wealth business:

With changes in the operating model of MMI, a decision was taken to group businesses into segments which are managed together. MMI has also simplified the valuations between covered and non-covered business (eg expense allocations, etc) and, as a result, now report the off-balance sheet businesses of Momentum Wealth together with the on-balance sheet businesses as part of Momentum Investments covered business.

Corporate governance

The board has satisfied itself that appropriate principles of corporate governance (King IV) were applied throughout the period under review.

Changes to the directorate, secretary and directors' shareholding

On 30 September 2018, the group's company secretary, Maliga Chetty, resigned. On the same date, Leon Basson was appointed as acting group company secretary. On 26 November 2018, Sydney Muller retired from the board having reached retirement age. On 28 February 2019, Louis von Zeuner resigned from the board. On 1 March 2019, Lisa Chiume, Prof Linda de Beer, Dr Sharron McPherson and Sello Moloko were appointed to the board. Also on that date, CorpStat Governance Services (Pty) Ltd was appointed as interim group company secretary. Leon Basson will relinquish his role as acting group company secretary on that date, to resume his other duties in the group.

All transactions in listed shares of the company involving directors were disclosed on SENS.

Changes to the group executive committee

| Resignations | Role | Date |
|-----------------------|---------------------------------------|------------------|
| Andrew le Roux | Chief Business Transformation Officer | 31 August 2018 |
| Linda Mthenjane | Head: MMI Human Capital | 30 November 2018 |
| Thinus Alsworth-Elvey | CEO: Momentum Corporate | 31 March 2019 |

Contingent liabilities and capital commitments

The group is party to legal proceedings and appropriate provisions are made when losses are expected to materialise. Met Collective Investments (RF) (Pty) Ltd has been subjected to a review by the FSCA. MMI is continuing to engage the FSCA on the matter. The group had no material capital commitments at 31 December 2018 that were not in the ordinary course of business.

Events after the reporting period

No material events occurred between the reporting date and the date of approval of these results.

Interim dividend declaration

Ordinary shares

- On 8 March 2019, a gross interim dividend of 35 cents per ordinary share was declared.
- The dividend is payable out of income reserves to all holders of ordinary shares recorded in the register of the company at the close of business on Friday, 29 March 2019, and will be paid on Monday, 1 April 2019.
- The dividend will be subject to local dividend withholding tax at a rate of 20% unless the shareholder is exempt from paying dividend tax or is entitled to a reduced rate.
- This will result in a net final dividend of 28 cents per ordinary share for those shareholders who are not exempt from paying dividend tax.
- The last day to trade cum dividend will be Tuesday, 26 March 2019.
- The shares will trade ex dividend from the start of business on Wednesday, 27 March 2019.
- Share certificates may not be dematerialised or rematerialised between Wednesday, 27 March 2019 and Friday, 29 March 2019, both days inclusive.
- The number of ordinary shares at the declaration date was 1 497 475 356.
- MMI's income tax number is 975 2050 147.

Preference shares

 Dividends of R18.5 million (31.12.2017: R18.5 million; 30.06.2018: R18.5 million) (132 cents per share p.a.) were declared on the unlisted A3 MMI Holdings Ltd preference shares as determined by the company's Memorandum of Incorporation.

Share buy-back programme

• The group has concluded its share buy-back programme. A total of 106 million shares (R2 billion excluding transaction costs) have been bought back. 27 million shares (R487 million) are held by a subsidiary of the group.

Directors' responsibility

The preparation of these results are the responsibility of the directors. The summarised interim results have not been reviewed or audited by the external auditors. A printed version of the SENS announcement is available for inspection and may be requested from the group company secretary's office, Carien Breytenbach tel: +27 12 673 7479.

¹ The MMI Holdings Namibian group, Metropolitan Kenya and Cannon are consolidated at 96% in earnings. For purposes of diluted earnings, diluted non-controlling interests and investment returns are reinstated.

² Current period impairments relate to customer relationships in Africa due to a decline in the directors' valuation. The December 2017 period impairments relate mainly to software in Metropolitan Retail as certain components are no longer used.

The June 2018 period impairments relate mainly to software in Metropolitan Retail as certain components are no longer used and goodwill in Momentum Investments (previously International under the old operating model) due to a decline in the directors' valuation relating to a restructure of the UK businesses.

³ Headline earnings consist of operating profit, investment income, net realised and fair value gains, investment variances and basis and other changes.

⁴ Normalised headline earnings excludes adjustments for MMI shares held by policyholder funds, the amortisation of intangible assets relating to business combinations as well as BEE costs. It includes basis changes and investment variances of negative R13 million (31.12.2017: positive R41 million; 30.06.2018: negative R651 million).

Share buy-back programme

At 31 December 2018, a total of 106 million shares (R2 billion excluding transaction costs) have been bought back as part of the share buy-back programme. The consideration paid has been adjusted for in retained earnings except for the 27 million shares (R487 million) held by a subsidiary of the group which has been adjusted for in share premium.

MMI Holdings Ltd convertible redeemable preference shares (issued to KTH)

The A3 MMI Holdings Ltd preference shares are redeemable in June 2019 (after extending it under the same terms by 18 months in the prior period) at a redemption value of R9.18 per share unless converted into MMI Holdings Ltd ordinary shares on a one-for-one basis prior to that date. The ordinary shares were originally issued at a price of R10.18 per share. Dividends are payable on the remaining preference shares at 132 cents per annum (payable March and September).

BUSINESS COMBINATIONS - DECEMBER 2018

There were no significant business combinations for the 6 months ended December 2018.

BUSINESS COMBINATIONS - DECEMBER 2017

There were no significant business combinations for the 6 months ended December 2017. Goodwill (R27 million), customer relationships relating to non-life business (R84 million), broker network (R71 million), and computer software (R5 million) were recognised due to small acquisitions.

BUSINESS COMBINATIONS – JUNE 2018

There were no significant business combinations for the 12 months ended June 2018. Intangibles relating to goodwill (R27 million), customer relationships relating to non-life business (R84 million) and health (R23 million), broker network (R71 million), and computer software (R5 million) were recognised due to small acquisitions.

¹ The table has been restated based on a new operating model adopted by the group. The group has also adopted normalised headline earnings as its primary earnings measure and not core headline earnings as previously disclosed. Refer to Appendix A for reconciliations of core headline earnings under the old model to normalised headline earnings under the new model.

² The 'Africa' column includes amounts received/incurred by companies the group has decided to exit: Net insurance premiums R324 million; external payments R183 million and administration expenses R171 million.

³ The 'Reconciling items' column includes: investment contract business premiums and claims; intergroup fee income and expenses; direct property (R225 million) and asset management fees for all entities (R318 million), except non-life entities, that are set off against investment income for management reporting purposes but shown as an expense for accounting purposes; asset management fees from cell captive business (R1 010 million); the amortisation of intangibles relating to business combinations (R357 million); expenses relating to consolidated collective investment schemes and other minor adjustments to expenses and fee income.

⁴ Included in diluted normalised headline earnings.

- ¹ The new regulatory framework, as defined in the South African Insurance Act, 18 of 2017, became effective on 1 July 2018. This meant that the previous Statutory Valuation Method was no longer recognised as a valid basis for regulatory liabilities. MMI covered businesses elected to adopt the IFRS liabilities as reference for determining the Value of In-force business for Embedded Value purposes. The remaining difference between the statutory and published valuation method is no longer applicable to the embedded value statement from 1 July 2018, but remain applicable to prior reporting periods.
- ² For accounting purposes, MMI Holdings Namibia, Metropolitan Kenya and Cannon have been consolidated at 96% in the statement of financial position. For embedded value purposes, disclosed on a diluted basis, the non-controlling interests and related funding have been reinstated.
- ³ Consolidation adjustments include mainly goodwill and intangibles in subsidiaries that are eliminated.
- ⁴ Adjustments for dilution are made up as follows:
- Dilutory effect of subsidiaries (note 2): R117 million (31.12.2017: R109 million; 30.06.2018: R114 million)
- Treasury shares held on behalf of contract holders: R277 million (31.12.2017: R323 million; 30.06.2018: R292 million)
- Liability MMI Holdings Ltd convertible preference shares issued to KTH: R254 million (31.12.2017: R254 million; 30.06.2018: R254 million)
- ⁵ The holding company expenses reflect the present value of projected recurring head office expenses. The international holding company expenses reflect the allowance for support services to the international life assurance and health businesses.
- ⁶ The required capital for in-force covered business amounts to R7 098 million (31.12.2017: R9 829 million; 30.06.2018: R10 073 million) and is adjusted for qualifying debt of R4 391 million (31.12.2017: R4 381 million; 30.06.2018: R4 374 million). With the new required capital methodology, that coincided with the implementation of the new regulatory framework as of 1 July 2018, MMIGL has adopted a target range for Solvency Cover of 1.7 to 2.1 times the SCR. This makes allowance for the capital required to support the covered business as well as the wider strategic deployments of the group. The required capital allocated to the South African in-force covered business represents the IFRS shareholder assets required to provide resilience against a range of severe but plausible scenarios, based on stress testing of the new regulatory balance sheet. For the international covered business, required capital is determined as a multiple of the statutory capital adequacy requirements.
- ⁷ The diluted number of shares in issue takes into account all issued shares, assuming conversion of the convertible redeemable preference shares, and includes the treasury shares held on behalf of contract holders.

| Net value of in-force business | 21 140 | 22 694 | 22 133 |

With the adoption of the new regulatory framework for South African insurers, MMI covered businesses elected to adopt the IFRS liabilities as reference for determining the Value of In-force business for Embedded Value purposes. For purposes of determining the Cost of Required Capital, total Restricted Assets were defined in terms of the new regulatory balance sheet by referencing the regulatory technical provisions and SCR. Required Capital is derived as the total Restricted Assets less the IFRS liabilities.

² Prior periods have been restated to include Wealth business in the Momentum Investments segment.

¹ Prior periods have been restated to reflect the transfer of Wealth to covered business.

² Included in covered business is Wealth business not deemed to be long-term insurance business with an adjusted net worth of R436 million (31.12.2017: R432 million; 30.06.2018: R582 million) and value of in-force of R171 million (31.12.2017: R573 million; 30.06.2018: R229 million).

³ The international holding company expenses reflect the allowance for support services to the international life assurance and health businesses. The holding company expenses reflect the present value of projected recurring head office expenses.

| percentage of PVP | 0.8 | 0.3 | 1.6 | 1.1 | (0.2) | 0.7 |

¹ Value of new business and new business premiums are net of non-controlling interests.

² MMI typically does not include any basis changes for interim reporting, i.e. the value of new business has been calculated on opening demographic assumptions. Investment yields at the point of sale have been used for fixed annuity and guaranteed endowment business; for other business the investment yields at the reporting date have been used. MMI does not allow for marginal diversification benefits to be allocated to the value of new business for purposes of deriving the cost of required capital.

³ Prior periods have been restated to include Wealth that was transferred to covered business.

⁴ Included in covered business is Wealth business not deemed to be long-term insurance business with value of new business of R2 million (31.12.2017: R9 million; 30.06.2018: R39 million).

| RECONCILIATION OF LUMP SUM INFLOWS | 6 mths to 31.12.2018 Rm | Restated 6 mths to 31.12.2017 Rm | Restated 12 mths to 30.06.2018 Rm |

| Risk-free return ³ | 9.7 | 9.4 | 9.5 |
| Risk discount rate (RDR) | 12.0 | 11.6 | 11.8 |
| Investment return (before tax) - balanced portfolio ³ | 11.9 | 11.5 | 11.7 |
| Renewal expense inflation rate ⁴ | 6.5 | 6.7 | 6.5 |

¹ The principal assumptions relate only to the South African life insurance business. Assumptions relating to international life insurance businesses are based on local requirements and can differ from the South African assumptions.

B. EXPECTED RETURN

The expected return is determined by applying the risk discount rate applicable at the beginning of the reporting year to the present value of in-force covered business at the beginning of the reporting year. The expected return on new business is determined by applying the current risk discount rate to the value of new business from the point of sale to the end of the year.

C. RELEASE FROM THE COST OF REQUIRED CAPITAL

The release from the cost of required capital represents the difference between the risk discount rate and the expected after tax investment return on the assets backing the required capital over the year.

D. EXPECTED (OR ACTUAL) NET OF TAX PROFIT TRANSFER TO NET WORTH

The expected profit transfer for covered business from the present value of in-force to the adjusted net worth is calculated on the statutory valuation method.

² The assumptions quoted in the table are representative rates derived at the 10-year point of the yield curves.

³ Risk-free returns are taken from an appropriate market related, risk-free yield curve as at the valuation date. Appropriate risk premia are added to the risk-free yields in order to derive yields on other asset classes. Expected cash flows at each duration are discounted using yields appropriate to that duration. The investment return on balanced portfolio business was calculated by applying the above returns to an expected long-term asset distribution.

⁴ For the retail businesses an inflation rate of 6.0% p.a. is used over the planning horizon (three years) where after the inflation rate is derived from market inputs as the difference between nominal and real yields across the term structure of these curves. An addition to the expense inflation is allowed for in some divisions to reflect the impact of closed books that are in run-off. For Momentum Corporate a fixed real return of 2.4% is projected. The 6.5% above represents the 10-year point of the yield curves.

Notes

- 1. Overall, mortality and morbidity experience for the 6 months were better compared to what was allowed for in the valuation basis.
- 2. Positive alteration experience due to better than expected take-up of premium increases were offset by negative termination experience and larger than expected premium discounts.
- 3. Lower commission payments than expected.
- 4. Good retention on risk business.
- 5. Profits earned on administration only business.
- 6. Mainly due to a correction relating to reinsurance premiums.
- 7. Mainly due to a correction relating to claw back commission.

F. DEVELOPMENT EXPENSES

Business development expenses within segments.

| Investment income Capital appreciation and other Preference share dividends paid and change in fair value of preference shares | 305 (245) (17) | 276 151 (18) | 559 171 (35) |
| Investment return on adjusted net worth | 43 | 409 | 695 |

I. INVESTMENT VARIANCES

Investment variances represent the impact of higher/lower than assumed investment returns on current and expected future after tax profits from in-force business.

J. ECONOMIC ASSUMPTION CHANGES

The economic assumption changes include the effect of the change in assumed rate of investment return, expense inflation rate and risk discount rate in respect of local and offshore business.

K. EXCHANGE RATE MOVEMENTS

The impact of foreign currency movements on International covered businesses.

L. EXCEPTIONAL ITEMS

With the adoption of the new regulatory framework for South African insurers, MMI covered businesses elected to adopt the IFRS liabilities as reference for determining the Value of In-force business for Embedded Value purposes. This has resulted in a reallocation of value between the Adjusted Net Worth and Value of In-force due to the liability difference between the previous statutory and IFRS liabilities. For purposes of determining the Cost of Required Capital, total Restricted Assets were defined in terms of the new regulatory balance sheet by referencing the regulatory technical provisions and SCR. Differences in the nature of the Required Capital between the new and the previous basis (which referenced Capital Adequacy Requirement) has resulted in a positive impact on the embedded value.

M. TRANSFER OF BUSINESS FROM/TO NON-COVERED BUSINESS

Transfer of business between covered and non-covered business.

N. OTHER CAPITAL TRANSFERS

Capital transfers include the alignment of the net asset value of subsidiaries between covered and non-covered business and the recapitalisation of some International subsidiaries.

¹ No corresponding changes in variable policy charges are assumed, although in practice it is likely that these will be modified according to circumstances.

² Bonus rates are assumed to change commensurately.

³ The change in the value of cost of required capital is disclosed as nil where the sensitivity test results in an insignificant change in the value.

¹ Comparative information not required in terms of IFRS 9.

² The carrying value of financial assets carried at amortised cost and insurance and other receivables approximates fair value. The fair value of borrowings at amortised cost is R2 168 million and the carrying value of other payables approximates fair value due to their short-term nature.

³ With the adoption of IFRS 9 policy loans have been reallocated to insurance and other receivables on the balance sheet. Policy loans are not within the scope of IFRS 9.

⁴ The value of investment contracts with discretionary participation features (DPF) is the retrospective accumulation of the fair value of the underlying assets, which has been used as an approximation for the fair value of this financial liability as the fair value cannot be measured reliably. There is no intention to dispose of these financial instruments.

| FINANCIAL ASSETS SUMMARISED BY MEASUREMENT CATEGORY IN TERMS OF IAS 39 | 31.12.2017 Rm | 30.06.2018 Rm |

¹ The liability ECL adjustment relates to tax on the impairment provision increase.

The different valuation method levels have been defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: Input other than quoted prices included within level 1 that is observable for the asset or liability, either directly (that is, prices) or indirectly (that is, derived from prices)
- Level 3: Input for the asset or liability that is not based on observable market data (that is, unobservable input)

VALUATION TECHNIQUES USED IN DETERMINING THE FAIR VALUE OF LEVEL 2 FINANCIAL ASSETS AND LIABILITIES

Group's valuation processes

The group's in-house valuation experts perform the valuations of financial assets required for financial reporting purposes. Discussions of valuation processes and results are held at least bi-annually, in line with the group's bi-annual reporting dates.

| Instrument | Valuation basis | Main assumptions |
|---|---|--|
| Equities and similar securities | | • |
| - Listed, local and foreign | External valuations/quoted prices | Management applies judgement if an adjustment of quoted prices is required due to an inactive market |
| Stock of and loans to other public bodies | | |
| - Listed, local | Yield of benchmark (listed government) bond | Market input |
| - Listed, foreign | Discounted cash flow (DCF), benchmarked against similar instrument with the same issuer | Market input |
| - Unlisted | DCF, real interest rates, six-month JIBAR plus fixed spread or risk-free yield curve plus fixed spread | Market input and appropriate spread |
| Other debt securities | | |
| - Listed, local | DCF (BESA and ASSA bond perfect fit zero curve and other published real or nominal yields, uplifted with inflation), external valuations (linked notes), or published price quotations on JSE equity (preference shares) and interest rate market | Market input, uplifted with inflation |
| - Listed, foreign | Published price quotations, external valuations that are based on published market input | Market input |
| - Unlisted | DCF (market-related nominal and real discount rates, prime and dividend return rate, bank and credit default swap curves, three-month JIBAR plus fixed spread), external valuations | Market input and appropriate spread |
| Funds on deposit and other | | |
| money market instruments - Listed | DCF (market-related yields), issue | Market input (based on quotes |
| 0.00 | price, or external valuations | received from market participants and valuation agents) |
| - Unlisted | Deposit rates, or DCF (market-related yields) | Market input (based on quotes received from market participants and valuation agents) |
| Unit-linked investments | External valuations | Net asset value (assets and liabilities are carried at fair value) |

VALUATION TECHNIQUES USED IN DETERMINING THE FAIR VALUE OF LEVEL 2 FINANCIAL ASSETS AND LIABILITIES (continued)

| Instrument | Valuation basis | Main assumptions |
|--|---|---|
| of estimated floating costs less the performance of the underlying index over the contract term/DCF (using fixed contract rates and market-related variable rates adjusted for credit risk, credit default swap premiums, offset between strike price and market projected forward value, yield curve of similar market-traded instruments) Subordinated call notes (Liability) Price quotations on JSE interest rate | | Market input, credit spreads, contract inputs |
| Subordinated call notes (Liability) | Price quotations on JSE interest rate market (based on yield of benchmark bond) | Market input |
| Carry positions (Liability) | DCF (in accordance with JSE interest rate market repo pricing methodology) | Market input, contract input |
| Preference shares (Liability) | Capital outstanding plus accrued dividends | Contract input |

There were no significant changes in the valuation methods applied since the prior period.

INFORMATION ABOUT FAIR VALUE MEASUREMENTS USING SIGNIFICANT UNOBSERVABLE INPUTS (LEVEL 3)

| | Valuation technique(s |) Unobservable inputs | Range of unobservable inputs (probability weighted average) | Relationship of unobservable inputs to fair value |
|---|---|---|---|--|
| Financial assets | | , | , | • |
| Securities at fair value through income | | | | |
| Equity securities | | | | |
| Foreign listed | Mark to model | Adjustments to market-related inputs as a result of inactivity | Could vary significantly due to the different risks associated with the investee | The greater the adjustments, the higher the fair value |
| Unlisted | Net asset value | Fair value of the respective assets and liabilities | Could vary significantly based on the assets and liabilities held by the investee | The higher the NAV, the greater the fair value |
| | Mark to model | Adjusted price-earnings ratios | Could vary significantly due to the different risks associated with the investee | The higher the price-earnings multiple, the greater the fair value |
| Debt securities Stock and loans to government and other public bodies | | | | |
| Unlisted | Discounted cash flow | Nominal interest rate | 8.00% to 11.00% (December 2017: 8.50% to 10.00%; June 2018: 8.00% to 11.31%) | The higher the nominal interest rate, the lower the fair value of the assets |
| Other debt instruments | | | | |
| Foreign listed | Mark to model | Adjustments to market-related inputs | Could vary significantly due to the different risks associated with the investee | The greater the adjustments, the lower the fair value |
| Unlisted | Discounted cash flow | Nominal interest rate | 7.95% to 11.42%; 5.45% to 15.40% (December 2017: 7.57% to 11.15%; 7.34% to 15.59%) (June 2018: 7.56% to 11.43%; 6.90% to 15.12%) | The higher the nominal interest rate, the lower the fair value of the assets |
| | Mark to model | Adjustments to market-related inputs as a result of inactivity | Could vary significantly due to the different risks associated with the investee | The greater the adjustments, the lower the fair value |
| | Net asset value | Fair value of the respective assets and liabilities | Could vary significantly based on the assets and liabilities held by the investee | The higher the NAV, the greater the fair value |
| Funds on deposit and other money market instruments | | | | |
| Unlisted | Deposit rates or discounted cash flow (market-related yields) | Market input (based on quotes received from market participants and valuation agents) | Could vary significantly due to the different risks associated with the investee | The greater the adjustments, the higher the fair value |

| Treasury shares held on behalf of contract holders | 16 | 17 | 16 | 18 |
| Convertible redeemable preference shares | 28 | 28 | 28 | 29 |
| Diluted number of shares in issue ³ | 1 499 | 1 557 | 1 604 | 1 604 |
| Market capitalisation at end (Rbn) ⁴ | 26 | 28 | 34 | 32 |

¹ Percentages have been annualised.

² Comparatives have been restated for normalised headline earnings.

³ The diluted number of shares in issue takes into account all issued shares, assuming conversion of the convertible redeemable preference shares, and includes the treasury shares held on behalf of contract holders.

⁴ The market capitalisation is calculated on the fully diluted number of shares in issue.

CHANGES TO PRIMARY EARNINGS METRIC AND SEGMENTAL REPORTING

As communicated at the last annual results announcement, MMI Holdings Ltd (MMI) has changed its primary earnings metric from core headline earnings to normalised headline earnings, in order to align closer to earnings metrics used by the South African insurance industry. Furthermore, following a revision to its internal operating structure, MMI has changed its reporting segments, to align to its current operating model.

These changes have been applied to the reporting period ended 31 December 2018. For illustrative purposes, this disclosure supplement provides segmental earnings for the comparative reporting periods 31 December 2017 and 30 June 2018 and because of their nature, they do not fairly present MMI's financial position, changes in equity, results of operations or cash flows. Please take note that the historical information contained in this supplementary information has not been reviewed by the auditors of MMI. This supplementary financial information is the responsibility of the directors of MMI.

Primary earnings metric

MMI has changed its primary earnings metric from core headline earnings to normalised headline earnings. Compared to core headline earnings, normalised headline earnings has fewer adjustments to the definition of headline earnings and is more comparable to primary earnings metrics used by the South African insurance industry.

Normalised headline earnings include the impact of investment variances, actuarial basis changes and other non-recurring items that were previously not reported as part of core headline earnings. However, normalised headline earnings still adjust the standard definition of headline earnings for treasury shares and for the amortisation of intangible assets from business combinations. MMI is of the opinion that these adjustments present a more realistic picture of underlying performance and remove distortions that might arise from elimination of treasury shares (potential distortions that are peculiar to financial institutions that invest in their own securities on behalf of clients).

New reporting segments

To more meaningfully report on earnings and growth, MMI has aligned its reporting segments to its revised internal operating structure.

The historic segment of Momentum Retail has been split into Momentum Life and Momentum Investments. Momentum Life includes protection, savings and traditional products focused on the middle and affluent client segments. Momentum Investments consists of Momentum Wealth platform business, local and offshore asset management operations, retail annuities and guaranteed investments, as well as Eris Properties. All Momentum Wealth products are now reported as covered business, and prior year value of new business and present value of new business premiums have been restated accordingly.

There are no material changes to the Metropolitan Retail reporting segment. Metropolitan Retail focusses on the lower to mid-income retail market segment, with a range of protection and savings products.

Momentum Corporate offers group risk, annuities, pensions savings and umbrella funds (FundsAtWork) and includes MMI Health.

Non-life Insurance is a new reporting segment, comprising the retail general insurance offering, Momentum Short-term Insurance (MSTI) and the cell captive insurer, Guardrisk.

The former international segment has been split: Africa (excluding South Africa) will be shown separately, with India and aYo now reported under New Initiatives, alongside Money Management and other smaller initiatives.

The Shareholder segment reflects investment income on capital held to support local operations and some costs not allocated to operating segments (eg certain holding company expenses).
