Financial Results

Results for the year ended 30 June 2018

Summary of key metrics

During the year MMI Holdings has made good progress on implementing our plan to increase focus on execution. This reset in priorities is done to enable improved performance and future growth. Key activities include encouraging a more entrepreneurial culture, increased focus on successfully growing our core businesses in South Africa, and exiting marginal operations outside South Africa. To this end, we have also simplified our operating model and empowered our businesses with end-to-end accountability from sales to service. Although the continued challenging macro-economic environment negatively impacted MMI's financial results for the year ended 30 June 2018, operational shortcomings also played a part in the disappointing set of results.

MMI's diluted core headline earnings of R2 809m (176 cents per share) were down 12% year-on year. This was despite strong mortality and disability results across the group (risk experience improved by R201m), as well as improved International results for remaining core operations (improvement of R118m). These positive factors were more than offset by increased investment in client engagement activities and specific technology investments to improve intermediary and client experience (increase of R92m), the impact of a reinsurance correction and a reinsurance loss including an allowance for higher future reinsurance premiums on Momentum Retail risk products (R181m aggregate negative impact), lower profits from the Momentum Retail legacy life products (R120m decline) and weaker early duration lapse experience in Metropolitan Retail (R44m reduction in IFRS persistency variance). MMI's share of losses from our new initiative investments in India and aYo increased by R90m, in line with business plans.

Diluted headline earnings were R1 341m lower than diluted core headline earnings in F2018. Of this difference, R685m arises from changes to actuarial assumptions. The positive investment variances seen during the first half of the year reversed due to the low investment market returns and a downward move in the yield curve between 31 December 2017 and 30 June 2018. Material actuarial assumption changes include a strengthening of the expense basis for retail operations, strengthened early duration lapse rates in Metropolitan Retail, and a lower assumed exposure to equities for the long-term portfolio supporting some of our large product lines. Another R115m of the difference is attributable to non-recurring items. including R77m arising from our decision to reduce our footprint in Africa and the UK.

At the interim results announcement, we communicated that we have revised our dividend policy and that we would repurchase R2bn worth of shares in lieu of paying dividends during the current calendar year as long as the share price remained at discount to embedded value (EV). At 30 June 2018, 47 million shares (R971 million, excluding trading cost) have been bought back. In doing this, we acquired R1.2 bn EV.

New business volumes are up 1% year-on-year to R42.2bn on a present value of new business premiums (PVNBP) basis. This included year-on-year growth of 3% for Momentum Retail and 1% growth for Momentum Corporate. PVNBP for Metropolitan Retail was down 1% for the year and International's PVNBP was down 8%, driven by a 13% decline in Namibia.

Overall value of new business (VNB) was disappointing and declined to R301m. This resulted in new business margins declining from 1.3% to 0.7% of premiums. Although overall sales volumes remained flat over the period, the margins were driven down by expenses increasing at a faster rate, significant assumption changes which partly resulted from more realistic treatment of expenses that were previously classified as unallocated, and re-pricing of some products. The increase in expenses includes investment into initiatives aimed at improving client and intermediary experience during the new business process. We believe that the main drivers of margin improvement in the future will be to improve the productivity and scale of our various distribution capabilities, as well as reducing operational and infrastructure costs. This will require ongoing product development and improvements in client service experience.

Group embedded value declined to R39.6bn (June 2017 EV was R42.5bn). This equates to EV per share of R25.43 at 30 June 2018. The return on embedded value (ROEV) for the year was -1.1% with the ROEV on covered business (mature life insurance operations) increasing by 7.3% during the period. The actuarial assumption changes mentioned above had a negative impact on covered EV earnings. The ROEV on non-covered business was significantly negative. This was mainly due to the implementation of a new methodology to determine non-covered valuations, which resulted in downward adjustments in the valuation of most businesses. The businesses mostly affected include asset management subsidiaries, Client Engagement Solutions and the holding company.

Key metrics	F2018	F2017	Δ %
Diluted core headline earnings (Rm)	2 809	3 208	(12)
Diluted core headline earnings per share (cents)	176	200	(12)
Diluted headline earnings per share (cents)	93	118	(21)
Operating profit after new initiatives (Rm)	2 345	2 600	(10)
Operating profit before new initiatives (Rm)	2 667	2 795	(5)
New business volumes (PVNBP, Rm)	42 177	41 595	1
Value of new business (Rm)	301	547	(45)
New business margin (%)	0.7	1.3	(0.6)
Embedded value per share (cents)	2 543	2 651	(4)
Return on Embedded Value (%)	(1.1)	4.7	(5.8)

Analysis of Group earnings

Diluted core headline earnings of R2 809m for the period declined by 12% year-on-year. Operating profits declined by 10% year-on-year, however, if we exclude the impact of our four large strategic investments (India, aYo, MMI Lending and Money Management) the operating profit on the established businesses declined by 5%.

Momentum Retail

Momentum Retail's core headline earnings declined by 28% to R920m. Earnings from covered operations (life insurance) were down 25% to R1 096m while losses from non-covered operations narrowed by 10% to R176m. Life Insurance demographic experience was strong with mortality, morbidity and persistency experience all better than expected. This was however offset by an allowance to correct a historic underpayment of reinsurance premiums (R43m), higher reinsurance premiums in the current year (R138m), and generally higher operating expenses relative to F2017. Covered core headline earnings for Momentum Investments declined R145m year-on-year. This was mainly due to modest growth in funds under management. Core headline earnings from the Legacy book declined by R120m year-on-year, largely as a result of a lower opening asset base. The corrected reserving for Investo Loyalty Bonus also continues to put pressure on the Legacy earnings.

Non-covered business in Momentum Retail showed an improvement of 10% to a loss of R176m. Notably, MSTI's core earnings improved by R91m year-on-year to a profit of R8m due to good growth in earned premiums, lower claims ratios, good expense management and the full recognition of the deferred tax asset in line with continued improvement in results. Momentum Health (the open scheme) also showed improved results due to increased membership and good expense management. These improvements were partly offset by the lower earnings from the non-covered Investments business and increased investment in our client engagement capabilities.

Metropolitan Retail

Metropolitan Retail's core headline earnings declined by 14% to R570m, mainly due to the weaker early duration lapse experience on funeral products, as well as investments in the African Bank joint venture, in our own branch network, and to improved technology available to our senior advisers. The decision to adopt a more conservative approach to capitalising IT development costs also affected earnings negatively. This was partly offset by positive mortality experience and investment returns.

Momentum Corporate

Momentum Corporate's core headline earnings increased by 8% to R903m. This increase was partly driven by an improvement in group risk underwriting experience.

This includes a strong improvement of roughly R100m year-on-year on PHI disability experience. This was partly offset by a decline in risk experience on group life insurance and lump sum disability business. Management initiatives around the underwriting experience such as premium re-ratings, increased focus on client servicing and the revised risk-pricing strategy have all contributed to the improved underwriting earnings performance. An emphasis on expense management also had a positive impact on earnings.

Guardrisk performed exceptionally well again, increasing its core headline earnings by 29% year-on-year to R258m. One of the main drivers of the performance is a significant improvement in underwriting experience for the year. In the Health business (corporate and public sector schemes), expense savings were a notable contributor of the 11% earnings improvement to R150m. This includes the impact of introducing a 49% BEE shareholding into our public sector business which reduced our share of earnings by R25m.

International

Core headline earnings have improved significantly from a loss of R166m for the previous period to a loss of R48m for F2018. This includes the impact of R88m higher losses from our mobile insurance start up initiative (aYo) and the health insurance joint venture in India (Aditya Birla). These losses are in line with our business plans. The overall improvement was mainly due to a R57m reduction in central support costs as we start our exit from some African countries, improved PHI experience in Namibia, as well as strong profit growth from our UK asset management business. Growth in the Ghana, Nigeria, and Lesotho life businesses also contributed to the improved result.

Shareholder Capital

The Shareholder Capital segment reflects investment income on capital held to support operations, earnings from start-up ventures not yet incorporated into other segments, and costs not allocated to operating segments (mainly holding company expenses).

The core headline earnings contribution from Shareholder Capital is down 24% to R464m for F2018, partially due to the sale of a high-yielding property that was held in the shareholder portfolio during F2017, the proceeds of which are now utilised for ongoing property developments that are not yet in rental generating stage. A decrease in average money market yields also impacted the Shareholder Capital earnings. Finance costs on subordinated debt also increased due to R750m of new debt being issued during the period. It should also be noted that the ongoing investments into new initiatives have a negative impact on the size of the investment income earning asset base.

Core headline earnings (Rm)	F2018	F2017	Δ %
Momentum Retail	920	1271	(28)
Metropolitan Retail	570	660	(14)
Momentum Corporate	903	835	8
International	(48)	(166)	71
Operating segments	2 345	2 600	(10)
Shareholder Capital	464	608	(24)
Diluted core headline earnings	2 809	3 208	(12)

New business commentary

New business volumes for the year increased 1% to R42.2bn when measured as PVNBP. The largest contributor to new business is Momentum Retail where volumes ended 3% higher for the period. Overall the new business margin was disappointing and declined to 0.7%.

Momentum Retail

Momentum Retail sales were 3% up over the year on a PVNBP basis. Single premium business increased by 2% while recurring premium business increased by 1%. We have seen good growth in our offshore Wealth business, in the new Guaranteed Return Option product, and in recurring savings products. The increase in volumes did not translate into growth in value of new business, which decreased to R98m (0.4% margin on premiums). This was mainly driven by initial expenses increasing at a faster rate than volume growth. In addition, more competitive pricing introduced on our Momentum Wealth platform in April 2017 also negatively affected value of new business.

Metropolitan Retail

Metropolitan Retail sales volumes on a PVNBP basis were down 1% year-on-year. Metropolitan grew recurring premiums by 2%, including risk business up 1% and savings business up 4%. PVNBP was negatively affected by strengthening of the early duration lapse assumptions. Value of new business

declined to R84m mainly due to the new lapse assumptions, higher renewal expense assumptions and a change in mix towards lower margin products. New business margin decreased to 1.6%.

Momentum Corporate

Momentum Corporate new business on PVNBP basis increased 1% for the year. Recurring premiums were up 7% while single premiums were 10% down yearon-year. Improved recurring premiums were driven by our FundsAtWork umbrella fund. Large corporate risk inflows remained under pressure in line with the competitive underwriting cycle as well as the stricter pricing. With significant effort and resources having been dedicated to re-building the sales and distribution environment, it was pleasing to see increasingly improved new business performance as the financial year progressed. Value of new business in Corporate increased by 82% to R124m, while new business margin increased from 0.6% to 1.1%.

International

International new business volumes were down 8% year-on-year, which resulted in value of new business declining to a negative R5m. The decline can be ascribed to the combination of lower volumes and modelling changes on sales related expenses as well as an increase in initial expenses.

Present Value of New Business Premiums (Rm)	F2018	F2017	Δ %
Momentum Retail	23 531	22 774	3
Metropolitan Retail	5 091	5 164	(1)
Momentum Corporate	11 218	11 121	1
International	2 337	2 536	(8)
MMI total PVNBP	42 177	41 595	1

Embedded Value

Our total EV was R25.43 per share on 30 June 2018, representing an ROEV of negative 1.1% for the year. Our covered business produced reasonable EV growth given the significant negative impact of assumption changes and generated ROEV of 7.3%. The ROEV on non-covered operations was -35%, mainly resulting from a new valuation approach, which resulted in significant downward adjustments in the valuation of most businesses.

Operating assumption changes

We made significant operating assumption changes with a net negative impact on EV of R975m. The impact of the expense basis change for the retail businesses was negative R974m and was introduced following significant overall negative expense variances during F2018. This was partly offset by a positive expense basis change of R526m for Momentum Corporate.

Embedded value profits(Rm)	EV total	ANW	Net VIF
New business	301	(1658)	1 959
Unwind of RDR	2 691	0	2 691
Expected profit	0	3 766	(3 766)
Experience variance	(177)	(22)	(155)
Operating assumptions	(975)	(966)	(9)
Investment return on ANW	636	636	0
Investment variance	(46)	(81)	35
Economic assumption changes	29	18	11
FX translation effect	21	13	8
EV profit on non-covered	(2 949)	(2 949)	0
EV Earnings	(469)	(1 243)	774

Experience variance

Our overall experience variance, including development expenses, for the period was negative R177m.

Demographic risk experience variances were strong in aggregate (R359m) following the recovery in Momentum Corporate. Retail mortality and disability generated R279m of positive variances while Corporate generated a positive variance of R28m, compared to the R152m negative variance in the previous period. International generated a positive variance of R52m.

Our credit risk variance of R96m is down on the prior year number of R117m.

Persistency variance was negative R301m across the group, with the largest impact from the deterioration of persistency experience in Metropolitan Retail of R141m. This relates to the early duration lapses as discussed under new business commentary. We also saw R59m higher than expected terminations in group risk products as a result of highly competitive pricing observed across that market segment. Persistency experience on risk business in Momentum Retail was also negative due to a lower than expected termination experience on level-premium type products.

The negative expense variance for this period reflects the significant investment in our core business. The termination basis for Momentum Retail was strengthened again for the better than expected persistency on some of our Myriad products and Metropolitan Retail was strengthened in line with observed early lapse experience. Overall the termination basis changes had an impact of negative R315m.

Another major basis change includes a change in the assumed asset allocation (to a lower risk portfolio) for the long-term portfolio supporting the Myriad business, thereby reducing the consequential mismatch exposure for shareholders. We have also allowed for the impact of integrating Multiply into the valuation. Total modelling and other basis changes had a negative impact of R54m on EV.

Non-covered EV earnings

Non-covered EV earnings amounted to nearly negative R3bn for the period. This was mainly due to the reduced valuations of our asset management businesses, health operations, rewards programme and holding company expenses. Non-covered operations with positive ROEV contributions included Guardrisk, Eris, and our various health operations.

In reviewing the approach to modelling the noncovered operations, we have adopted a valuation approach that aims to achieve five outcomes:

- Valuations should be based on prudently realistic cash flows.
- Valuations should result in valuation metrics that are aligned to those found for listed entities of similar nature.
- Valuations should be expected to progress broadly in line with emergence of earnings from the business.
- Valuation methodologies should be as consistent as possible across the group.
- Generally simplicity is preferred to complexity in the valuation methodology.

Capital, capital distribution and outlook

Our capital position remains strong on the current statutory basis and we had a buffer of R2.4bn on 30 June 2018 on our internal basis. The CAR cover ratio was 2.6x as of 30 June 2018 compared to 2.7x as of 30 June 2017. On a Solvency Assessment and Management (SAM) basis MMI is also well capitalised after taking into account all capital deployment initiatives and planned capital distributions. In March 2018, Moody's Investors Service confirmed MMIGL's Insurer Financial Strength (IFS) international scale rating of Baa2 (national rating of Aaa.za) and Guardrisk's IFS rating of Baa3 (national scale rating of Aaa.za) with a stable outlook.

The capital buffer decreased by R1.3bn compared to 30 June 2017. This is the net impact from the following movements:

- R0.9bn decrease in the NAV as per the EV statement, driven by the low level of retained earnings
- R1.4bn increase in the NAV of strategic subsidiaries, the NAV is deemed ineligible for loss absorption purposes and therefore removed from the excess capital position
- An increase in subordinated debt of R750m that was raised during the financial year

Movement in capital buffer	R' billion
Opening capital buffer 30 June 2017	3.7
Profit from covered business	1.7
Profit from non-covered business	(0.2)
Dividends and new capital	(1.9)
Net subordinated debt raised	0.8
Increase in required capital	(1.2)
Change in strategic commitments	(0.4)
Closing capital buffer 30 June 2018	2.4

Actual capital investments during the period are generally budgeted for at the start of the year and thus do not tie up to 'Change in strategic commitments' in the table above. The following strategic investments were actually made during the period:

Area of capital distribution	R' billion
Capital support for subsidiaries	1.0
UK & Africa operations	0.5
Aditya Birla Joint Venture	0.2
Momentum Short Term Insurance	0.1
Other	0.2
Total	2.0

Capital distribution

At the interim results announcement it was announced that we have reviewed our dividend policy to ensure that it remains consistent with our capital deployment plans and the need to maintain steady capital ratios under the SAM regime. We indicated that we would in future target a dividend cover range centred on 2.5x core headline earnings.

Given that our shares are valued at a discount to EV, we also communicated at the interim results announcement that we opted to buy back shares of up to R2bn in 2018 in lieu of paying out dividends. We commenced our share repurchase programme on 7 March 2018. At 30 June 2018, 47 million shares, valued at R971m (excluding trading cost) have been bought back. In doing this, we acquired R1.2bn of EV in exchange for the R1.0bn of cash deployed.

The current buyback programme will almost certainly be fully utilised by end of the current calendar year. We will review the decision between continuing with the buyback programme versus paying a cash dividend for our F2019 interim results. The decision will be a function of our price-to-EV rating, our capital position, and shareholder requirements at such time.

Strategy update

MMI's vision to be the preferred lifetime Financial Wellness partner with a reputation for innovation and trustworthiness remains appropriate. It will however be brought to life in simpler terms: We exist to enable people from all walks of life and businesses to achieve their financial and life aspirations. The MMI Group strategy which focuses on client centricity, growth and excellence therefore remains intact. The specific strategic objectives will, however, be set in more practical and meaningful terms, with an increased focus on execution and delivery. As a group, MMI will refocus to be more entrepreneurial and commercial in its thinking and decision-making.

To execute on this strategy in a more efficient manner, we have introduced refinements to MMI's operating model. The new operating model design aims to encourage growth by empowering businesses with end-to-end accountability, which includes a practical client focus. Centralised functions need to demonstrate clear efficiency or standardisation benefits. We will also be increasingly vigilant on not attempting too many new initiatives at any given time.

Outlook

It is not easy to turn around a comprehensive financial services company like MMI. The maturity of the South African insurance markets and modest shortterm macro-economic growth prospects continues to put pressure on our revenue growth expectations. Given these factors, combined with increased losses expected in F2019 from our new initiatives, we expect only a modest increase in earnings for F2019. We will continue to focus on financial discipline, cost efficiencies and streamlining infrastructure to restore annual earnings to a level of R3.6bn - R4.0bn by F2021. Leading up to F2021, we will be working hard to build the foundation for longer-term prosperity, which will depend on a strong distribution and service culture, and relevant digital enablement.

5 September 2018 **CENTURION**

Summary of financial information

Audited results for the year ended 30 June 2018

DIRECTORS' STATEMENT

The directors take pleasure in presenting the audited summarised results of MMI Holdings financial services group for the year ended 30 June 2018. The preparation of the group's results was supervised by the group finance director, Risto Ketola (FIA, FASSA, CFA).

Corporate events

BEE transactions

In March, Metropolitan Health Holdings Ltd entered into a transaction with Workerslife SPV and Thebe SPV whereby they purchased 30% and 19% "A" ordinary shares in Metropolitan Health Corporate (Pty) Ltd (MHC) respectively. The "A" ordinary shares will automatically convert into ordinary shares after six months.

Providence Risk Managers (Pty) Ltd entered into a transaction with Thebe Ya Bophelo Administrators (Pty) Ltd whereby they purchased 48% ordinary shares in Providence Healthcare Risk Managers (Pty) Ltd.

Listed debt

MMI Group Ltd listed new instruments to the total value of R750 million on the JSE Ltd on 4 December 2017. The instruments are unsecured subordinated callable notes.

Basis of preparation of financial information

These summarised consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS); International Accounting Standard 34 (IAS 34) - Interim financial reporting (with the exception of disclosures required in terms of paragraph 16A(j)); the SAICA Financial Reporting Guide as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council; the JSE Listings Requirements and the South African Companies Act, 71 of 2008. The accounting policies applied in the preparation of these financial statements are in terms of IFRS and are consistent with those adopted in the previous years except as described below. Critical judgements and accounting estimates are disclosed in detail in the group's integrated report for the year ended 30 June 2018, including changes in estimates that are an integral part of the insurance business. The group is exposed to financial and insurance risks, details of which are also provided in the group's integrated report.

New and revised standards effective for the period ended 30 June 2018 and relevant to the group

- The following amendments to standards and interpretations became effective for the first time in the current period and had no impact on the group's earnings or net asset value: Amendments to IAS 7 Cash flow statements and IAS 12 Income taxes.
- The International Accounting Standards Board (IASB) made amendments to various standards as part of their annual improvements project. These amendments had no impact on the group's earnings.

Segmental report

The group's reporting view reflects the following segments:

Momentum Retail: Momentum Retail offers a wide range of financial solutions to middle and affluent market segments. Our product range spans all major insurance lines (life, disability, health, motor, property, and all-risks) and a wide range of savings and investment products. We differentiate our business through the quality of our advice channels and our commitment to high levels of client engagement to encourage our clients to make choices that optimise their financial and physical wellness. Our most popular product solutions are retirement savings and life insurance. Momentum Retail is closely associated with Multiply, our client engagement programme. Clients who have Multiply active on their policies enjoy premium discounts, partner rewards and access to personal financial management tools. Multiply encourages clients to be more healthy and active.

Metropolitan Retail: Metropolitan Retail is a long-established life insurance provider in the lower- and middle-income segments. Metropolitan Retail's most popular products include funeral plans, savings policies, underwritten life cover policies, and annuities. Our funeral plans are low sum insured whole life policies designed to pay for funeral costs. To extend our distribution channels and expand our solutions basket, Metropolitan recently partnered with African Bank to offer insurance products to African Bank's client base and lending products to the existing Metropolitan client base.

Momentum Corporate: Momentum Corporate provides insurance, administration and investment services to employee groups in the private and public sectors. The business is one of the largest underwriters of death and disability insurance in the corporate market. We also have a strong market share in umbrella funds (multi-employer retirement schemes) and annuity solutions.

International: MMI International operates in the rest of Africa, India and the United Kingdom. We offer a wide range of solutions in these areas, with a focus on life, health and short-term insurance products. In Africa, life insurance is offered in nine countries and health insurance offered in seven as well as in India. Our Multiply wellness programme is only active in India at present, where it complements the health insurance offering. We have announced our plan to exit a number of African countries to improve focus on remaining operations.

Shareholder Capital: The Shareholder Capital segment reflects investment income on capital held to support operations, earnings from start-up ventures not yet allocated to other segments, and some costs not allocated to operating segments (eg certain holding company expenses).

The product houses support the segments to deliver best of breed product solutions that segments can distribute to clients. There are five of these product houses supporting the segments, namely: Momentum Investments, Life Insurance, Health, Short-term Insurance and Client Engagement Solutions. Each of the product houses design solutions that meet unique Financial Wellness needs of clients as identified by our segment business.

Corporate governance

The board has satisfied itself that appropriate principles of corporate governance (King IV) were applied throughout the year under review.

Changes to the directorate, secretary and directors' shareholding

On 9 October 2017, Voyt Krzychylkiewicz resigned from the board. On 24 November 2017, Ben van der Ross retired from the board having reached retirement age. On 16 January 2018, Risto Ketola was appointed to the board as group finance director. On 15 February 2018, Nicolaas Kruger stepped down from the board and as CEO. On the same date, Hillie Meyer was appointed to the board as CEO. On 1 March 2018, Jeanette Cilliers (Marais) was appointed to the board and as deputy CEO. On 31 March 2018, Mary Vilakazi resigned from the board and as deputy CEO. The group's company secretary, Maliga Chetty, resigned with effect from 30 September 2018.

All transactions in listed shares of the company involving directors were disclosed on SENS.

Changes to the group executive committee

Appointments/resignations	Role	Appointments	Resignations

Contingent liabilities and capital commitments

The group is party to legal proceedings and appropriate provisions are made when losses are expected to materialise. The group had no material capital commitments at 30 June 2018 that were not in the ordinary course of business other than those disclosed in the 2018 integrated report.

Events after year-end

No material events occurred between the reporting date and the date of approval of these results.

Final dividend declaration

Ordinary shares

• No interim or final dividend has been declared.

Preference shares

• Dividends of R18.5 million (2017: R19.0 million) (132 cents per share p.a.) were declared on the unlisted A3 MMI Holdings Ltd preference shares as determined by the company's Memorandum of Incorporation.

Final dividend declaration (continued)

Share buy-back programme

. The group will continue to distribute capital to shareholders by means of repurchasing shares, in lieu of paying a dividend. Up to R2 billion will be used to buy back shares. At 30 June 2018, 47 million shares (R971 million excluding transaction costs) have been bought back.

Integrated information

The integrated report for 2018 will be posted to shareholders on or around 30 September 2018, and can be viewed online on 7 September 2018 at www.mmiholdings.com following the results announcement.

Directors' responsibility

The preparation of these results, and the correct extraction thereof from the group's audited 2018 annual financial statements, are the responsibility of the directors. This announcement does not include the information required by paragraph 16A(j) of IAS 34. The full summarised IAS 34 compliant results (including paragraph 16A(j)) are available on MMI's website and at MMI's registered offices upon request. A printed version of the full financial statements and the SENS announcement may be requested from the group company secretary, Maliga Chetty tel: 012 684 4255.

External audit

These summarised results have not been audited, but have been extracted from the group's 2018 annual financial statements, which have been audited by PricewaterhouseCoopers Inc. and their unqualified audit report, together with the group's audited 2018 annual financial statements, are available for inspection at the company's registered office and on MMI's website. In addition, the summarised group embedded value information has been extracted from the 2018 group embedded value report, which has been reviewed by PricewaterhouseCoopers Inc. in accordance with the embedded value basis of MMI, and the review report is available for inspection at the company's registered office.

- 1. MHC is consolidated at 51% (2017: 100%) and the MMI Holdings Namibian group, Metropolitan Kenya and Cannon are consolidated at 96% in earnings. For purposes of diluted earnings, diluted non-controlling interests and investment returns are reinstated. From June 2017, there is no longer a dilutory effect for MHC as all the shares which were held by Kagiso Tiso Holdings (Pty) Ltd (KTH) were purchased by the group in June 2017. The subsequent sale of the 49% shareholding in MHC in the current year does not have a dilutory effect.
- 2. Current year impairments relate mainly to software in Metropolitan Retail as certain components are no longer used and goodwill in International due to a decline in the directors' valuation relating to a restructure of the UK businesses.
 - The June 2017 period includes impairments relating to:
 - Goodwill, customer relations and internally developed software (R213 million) in the International segment that were recognised on acquisition of subsidiaries as the companies are making losses. A risk discount rate of 18.2% has been used in the impairment calculation.
 - Internally developed software in International (R88 million) and Metropolitan Retail (R76 million) whereby certain components will no longer be used and/or the costs to maintain the system exceed the economic benefits. A risk discount rate of 11.6% has been used in the impairment calculation.
- 3. Headline earnings consist of operating profit, investment income, net realised and fair value gains, investment variances and basis and other changes.
- 4. Non-recurring items include costs relating mainly to the restructuring of the group. It also includes the core earnings/loss relating to companies in countries that the group has or will be exiting in the near future.
- Core headline earnings comprise operating profit and investment income on shareholder assets. It excludes net realised and fair value gains on financial assets and liabilities, investment variances and basis and other changes that can be volatile, certain non-recurring items, BEE costs, as well as the amortisation of intangible assets relating to business combinations.

BUSINESS COMBINATIONS – JUNE 2018

There were no significant business combinations for the 12 months ended June 2018. Intangibles relating to goodwill (R27 million), customer relationships relating to short-term business (R84 million) and health (R23 million), broker network (R71 million), and computer software (R5 million)

BUSINESS COMBINATIONS - JUNE 2017

There were no significant business combinations for the 12 months ended June 2017. Goodwill and customer relationships to the value of R11 million each were recognised due to a small acquisition.

RECONCILIATION OF GOODWILL	30.06.2018 Rm	
Balance at beginning	1 128	1 237
Business combinations (1)	27	11
Impairment charges (2)	(31)	(100)
Exchange differences	-	(20)
Balance at end	1 124	1 128

- 1. An acquisition was made in the Guardrisk group for R90 million. This resulted in the recognition of R27 million goodwill in the current year. The entity's business is that of underwriting managers.
- 2. Goodwill relating to the Financial Partners (International segment) acquisition was impaired in the current year due to a decline in the directors' valuation relating to a restructure of the UK businesses. In the prior year, goodwill relating to the Cannon (International segment) and Momentum Financial Technology (International segment) acquisitions were fully impaired by R62 million and R38 million respectively due to these companies making losses.

MMI HOLDINGS GROUP - STATUTORY EXCESS

STATUTORY EXCESS	30.06.2018 Rm	30.06.2017 Rm
Group excess per reporting basis	22 328	22 956
Net assets – other businesses	(3 430)	(2 849)
Fair value adjustments on Metropolitan business acquisition and other consolidation adjustments	(2 684)	(2 946)
Excess – long-term insurance business, net of non-controlling interests (1)	16 214	17 161
Disregarded assets (2)	(1 111)	(847)
Difference between statutory and published valuation methods	(1 574)	(942)
Write-down of subsidiaries and associates for statutory purposes	(1 262)	(1 328)
Unsecured subordinated debt	4 374	3 602
Consolidation adjustments	(32)	(33)
Statutory excess – long-term insurance business	16 609	17 613
Capital adequacy requirement (CAR) (Rm) (3)	6 398	6 577
Ratio of long-term insurance business excess to CAR (times)	2.6	2.7
Discretionary margins	12 892	12 407

- 1. The long-term insurance business includes both insurance and investment contract business and is the simple aggregate of all the life insurance companies in the group, including life insurance companies in Africa. In respect of Guardrisk, only MMI's promoter exposure to the South African longterm insurance business, Guardrisk Life Ltd is included. It excludes the short-term insurance businesses of Guardrisk, Momentum Short-term Insurance and Cannon (Kenya), as well as the other non-life insurance entities, including African health operations. The figures are after noncontrolling interests but excludes certain items which are eliminated on consolidation.
- 2. Disregarded assets are those as defined in the South African Long-term Insurance Act, 52 of 1998, and are only applicable to South African long-term insurance companies. Adjustments are also made for the international insurance companies from reporting excess to statutory excess as required by their regulators. It includes Sage intangible assets of R431 million (2017: R464 million).
- 3. The CAR is an aggregation of the separate CAR's, with no assumption of diversification benefits. MMI elected to adopt the revised actuarial guidance note SAP 104 (version 9) which was published in August 2017 but permitted adoption for reporting dates on or after 30 June 2017.

MMI HOLDINGS GROUP - EMBEDDED VALUE INFORMATION

Write-up to directors' value	2 311	5 098
Diluted embedded value	39 601	42 523
Required capital – covered business (adjusted for qualifying debt) (6)	5 480	6 449
Surplus capital – covered business (adjusted for qualifying debt) (6)	5 356	6 486
Diluted embedded value per share (cents)	2 543	2 651
Diluted adjusted net worth per share (cents)	988	1 016
Diluted number of shares in issue (million) (7)	1 557	1 604

- 1. Disregarded assets include Sage intangible assets of R431 million (2017: R464 million), goodwill and various other items.
- 2. For accounting purposes, MMI Holdings Namibia, Metropolitan Kenya and Cannon have been consolidated at 96% in the statement of financial position. For embedded value purposes, disclosed on a diluted basis, the non-controlling interests and related funding have been reinstated.
- 3. Consolidation adjustments include mainly goodwill and intangibles in subsidiaries that are eliminated.
- 4. Adjustments for dilution are made up as follows:
 - Dilutory effect of subsidiaries (note 2): R114 million (2017: R106 million)
 - Treasury shares held on behalf of contract holders: R292 million (2017: R353 million)
 - Liability MMI Holdings Ltd convertible preference shares issued to KTH: R254 million (2017: R261 million)
- 5. The holding company expenses reflect the present value of projected recurring head office expenses. The international holding company expenses reflect the allowance for support services to the international life assurance and health businesses.
- 6. The required capital for covered business amounts to R9 854 million (2017: R10 051 million) and is adjusted for qualifying debt of R4 374 million (2017: R3 602 million).
- 7. The diluted number of shares in issue takes into account all issued shares, assuming conversion of the convertible redeemable preference shares, and includes the treasury shares held on behalf of contract holders.

- Covered methodology refers to APN107 (embedded value methodology) and the risk discount rate of covered business. Momentum Wealth, Guardrisk and selected International entities are valued using embedded value methodology.
- The International shared services impact reflects the allowance for support services to the international life and health businesses. The Shareholder head office expenses impact reflects the present value of projected recurring head office expenses.
- Appraisal value approach is followed for all remaining businesses. The key assumption used in the model is the distributable cash flow. Other assumptions include the risk discount rate (based on the risk free rate plus an assumed equity risk premium) and a calculated perpetuity factor.

PRINCIPAL ASSUMPTIONS (South Africa) (1, 4)	30.06.2018	30.06.2017
	%	%
Pre-tax investment return		
Equities	13.0	12.9
Properties	10.5	10.4
Government stock	9.5	9.4
Other fixed-interest stocks	10.0	9.9
Cash	8.5	8.4
Risk-free return (2)	9.5	9.4
Risk discount rate (RDR)	11.8	11.7
Investment return (before tax) – balanced portfolio (2)	11.7	11.6
Renewal expense inflation rate (3)	6.5	6.8

- 1. The principal assumptions relate only to the South African life insurance business. Assumptions relating to international life insurance businesses are based on local requirements and can differ from the South African assumptions.
- 2. Risk-free returns are taken from an appropriate market related, risk-free yield curve as at the valuation date. Appropriate risk premia are added to the risk-free yields in order to derive yields on other asset classes. Expected cash flows at each duration are discounted using yields appropriate to that duration. The investment return on balanced portfolio business was calculated by applying the above returns to an expected long-term asset distribution.
- 3. An inflation rate of 6.0% p.a. is used over the planning horizon (three years) where after the inflation rate is derived from market inputs as the difference between nominal and real yields across the term structure of these curves. An additional 1% expense inflation is allowed for in some divisions to reflect the impact of closed books that are in run-off.
- 4. The assumptions quoted in the table are representative rates derived at the 10-year point of the yield curves.

B. EXPECTED RETURN

The expected return is determined by applying the risk discount rate applicable at the beginning of the reporting year to the present value of in-force covered business at the beginning of the reporting year. The expected return on new business is determined by applying the current risk discount rate to the value of new business from the point of sale to the end of the year.

C. RELEASE FROM THE COST OF REQUIRED CAPITAL

The release from the cost of required capital represents the difference between the risk discount rate and the expected after tax investment return on the assets backing the required capital over the year.

D. EXPECTED (OR ACTUAL) NET OF TAX PROFIT TRANSFER TO NET WORTH

The expected profit transfer for covered business from the present value of in-force to the adjusted net worth is calculated on the statutory valuation method.

E. OPERATING EXPERIENCE VARIANCES

Opportunity cost of required capital	_	-	18	18	(12	
Total operating experience variances	_	29	(155)	(126)	18	

- 1. Overall, mortality and morbidity experience for the 12 months was better compared to what was allowed for in the valuation basis.
- 2. Mainly due to a change in the classification of business as alterations versus new business.
- 3. Due to additional investment in order to improve Momentum Retail's capabilities available to clients and intermediaries.
- 4. Includes one-off impact arising from reinsurance premium as well as larger than expected premium discounts.
- 5. Higher than expected terminations at early durations.
- 6. Terminations in respect of group risk business.
- 7. The impact of efficiencies achieved in the segment.
- Mainly due to a reduction in the investment fees of Smooth Bonus business.
- A bulk lapse was done in Namibia due to correction of a system error.

F. DEVELOPMENT EXPENSES

Business development expenses within segments.

Notes

- 1. Strengthening of the basis in line with experience observed in certain product lines.
- 2. Expense assumptions have been revised based on management's budgeted expenses for the new financial year.
- 3. Various modelling and methodology changes including refinements in the valuation of risk products offset by allowance for expected pricing reviews of Wealth products.
- 4. Strengthening of the lapse basis as well as splitting the bases by method of payment for certain funeral products.
- 5. Mainly due to lower expected experience profits from group risk business.
- 6. Updating of IBNR reserves.
- 7. Allowance for better than assumed mortality experience on risk business.
- 8. Various modelling and methodology changes made mainly in Namibia.

H. INVESTMENT RETURN ON ADJUSTED NET WORTH

INVESTMENT RETURN ON ADJUSTED NET WORTH	12 mths to 30.06.2018 Rm	12 mths to 30.06.2017 Rm
Investment income	557	620
Capital appreciation and other	114	68
Preference share dividends paid and change in fair value of preference shares	(35)	(36)
Investment return on adjusted net worth	636	652

I. INVESTMENT VARIANCES

Investment variances represent the impact of higher/lower than assumed investment returns on current and expected future after tax profits from inforce business.

J. ECONOMIC ASSUMPTION CHANGES

The economic assumption changes include the effect of the change in assumed rate of investment return, expense inflation rate and risk discount rate in respect of local and offshore business.

K. EXCHANGE RATE MOVEMENTS

The impact of foreign currency movements on International covered businesses.

L. TRANSFER OF BUSINESS TO NON-COVERED BUSINESS

Transfer of business between covered and non-covered business.

M. OTHER CAPITAL TRANSFERS

Capital transfers include the alignment of the net asset value of subsidiaries between covered and non-covered business and the recapitalisation of some International subsidiaries.
