INVESTOR CONSIDERATIONS/RISK FACTORS RELATED TO MOMENTUM METROPOLITAN LIFE LIMITED

Capitalised terms used in this section headed “Investor Considerations/Risk Factors related to Momentum Metropolitan Life Limited” shall bear the same meanings as used in the Terms and Conditions, except to the extent that they are separately defined in this section or this is clearly inappropriate from the context.

The Issuer believes that the factors outlined below may affect its ability to fulfil its obligations under the Notes. All of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring. In addition, factors which are material for the purpose of assessing the market risks associated with the Notes are also described below. The value of the Notes could decline due to any of these risks, and investors may lose some or all of their investment.

The Issuer believes that the factors described below represent the principal risks inherent in investing in the Notes, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with any Notes may occur for other reasons which may not be considered significant risks by the Issuer based on information available to it at the Information Statement Date, or which it may not be able to anticipate at the Information Statement Date. Accordingly, the Issuer does not represent that the statements below regarding the risks of holding any Notes are exhaustive.

Prospective investors should also read the detailed information set out elsewhere in the Programme Memorandum to reach their own views prior to making any investment decision.

References below to the “Terms and Conditions”, in relation to Notes, shall mean the “Terms and Conditions of the Notes” set out under the section of the Programme Memorandum headed “Terms and Conditions of the Notes”.

Factors that may affect the Issuer’s ability to fulfil its obligations under Notes issued under the Programme

Risks Relating to the Notes

The Notes may not be a suitable investment for all investors

Each potential investor in any Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in the Programme Memorandum or any applicable supplement;
- have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact such an investment will have on its overall investment portfolio;
- have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including Notes with principal or interest payable in one or more currencies, or where the currency for principal or interest payments is different from the potential investor’s currency;
- understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and
- be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Some Notes are complex financial instruments. Sophisticated institutional investors generally do not purchase complex financial instruments as stand-alone investments. They purchase complex financial instruments as a way to reduce risk or enhance yield with an understood, measured and appropriate addition of risk to their overall portfolios. A potential investor should not invest in Notes which are complex financial instruments unless it has the expertise (either alone or with a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor’s overall investment portfolio.

There may not be an active trading market for the Notes

Notes issued under the Programme will be new securities which may not be widely distributed and for which there is currently no active trading market (unless in the case of any particular Tranche, such Tranche is to be consolidated with and form a single series with a Tranche of Notes which is already issued). If the Notes are traded after their initial issuance, they may trade at a discount to their initial offering price, depending upon prevailing interest rates, the market for similar securities, general economic conditions and the financial condition of the Issuer. There is no assurance as to the development or liquidity of any trading market for any particular Tranche of Notes.

The Notes may be redeemed prior to maturity

Unless in the case of any particular Tranche of Notes the Applicable Pricing Supplement specifies otherwise, in the event that the Issuer would be obliged to increase the amounts payable in respect of any Notes due to any withholding or deduction for or on account of any present or future taxes, duties, assessments or governmental charges of whatever nature imposed, levied, collected, withheld or assessed by or on behalf of the government of South Africa or any political subdivision thereof or any authority therein or thereof having power to tax, the Issuer may redeem all outstanding Notes in accordance with the Conditions.

If in the case of any particular Tranche of Notes, such Notes are no longer or will no longer qualify as capital for purposes of the capital adequacy requirement applicable to the Issuer under the Regulatory Capital Requirement, the Issuer may redeem the relevant Notes in accordance with Condition 10.4 (*Early Redemption/Substitution following the occurrence of a Capital Disqualification Event*).

In addition, if in the case of any particular Tranche of Notes the Applicable Pricing Supplement specifies that the Notes are redeemable at the Issuer's option in certain other circumstances, the Issuer may choose to redeem the Notes at times when prevailing interest rates may be relatively low. In such circumstances an investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the relevant Notes.

Because uncertificated Notes are held in the CSD, investors will have to rely on their procedures for transfer, payment and communication with the Issuer

Notes issued under the Programme which are listed on the Interest Rate Market of the JSE or such other or additional Financial Exchange and/or held in the CSD may, subject to Applicable Laws and the Applicable Procedures, be issued in uncertificated form. Unlisted Notes may also be held in the CSD in uncertificated form. Notes held in the CSD will be issued, cleared and settled in accordance with the Applicable Procedures through the electronic settlement system of the CSD. Except in the limited circumstances described in the Terms and Conditions, investors will not be entitled to receive Individual Certificates. The CSD will maintain records of the Beneficial Interests in Notes and/or issued in uncertificated form, which are held in the CSD (whether such Notes are listed or unlisted). Investors will be able to trade their Beneficial Interests only through the CSD and in accordance with the Applicable Procedures.

Payments of principal and/or interest in respect of uncertificated Notes will be made to the CSD or the Participants and the Issuer will discharge its payment obligations under the Notes by making payments to or to the order of the CSD or the Participants for distribution to their account holders. A holder of a Beneficial Interest in uncertificated Notes, whether listed or unlisted, must rely on the procedures of the CSD to receive payments under the relevant Notes. Each investor shown in the records of the CSD or the Participants, as the case may be, shall look solely to the CSD or the Participant, as the case may be, for their share of each payment so made by the Issuer to the registered holder of such uncertificated Notes. The Issuer has no responsibility or liability for the records relating to, or payments made in respect of, such Beneficial Interests.

Holders of Beneficial Interests in uncertificated Notes will not have a direct right to vote in respect of the relevant Notes. Instead, such holders will be permitted to act only to the extent that they are enabled by the CSD to appoint appropriate proxies.

Recourse to the JSE Debt Guarantee Fund Trust

The holders of Notes that are not listed on the Interest Rate Market of the JSE will have no recourse against the JSE Debt Guarantee Fund Trust. Claims against the JSE Debt Guarantee Fund Trust may only be made in respect of the trading of Notes listed on the Interest Rate Market of the JSE and in accordance with the rules of the JSE Debt Guarantee Fund Trust. Unlisted notes are not regulated by

the JSE.

Credit Rating

Tranches of Notes issued under the Programme, the Issuer and/or the Guarantor and/or the Programme, as the case may be, may be rated or unrated. A Rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning Rating Agency. Any adverse change in an applicable credit rating assigned to any Notes, the Issuer, the Guarantor and/or the Programme could adversely affect the trading price for the Notes issued under the Programme.

Any amendment in the Rating of the Issuer and/or the Guarantors and/or the Programme and/or a Tranche of Notes, as the case may be, after the Information Statement Date, will be announced on SENS in accordance with the JSE timelines.

Risks related to the structure of the particular issue of Notes

A wide range of Notes may be issued under the Programme. A number of these Notes may have features which contain particular risks for potential investors. Set out below is a description of certain such features:

Notes subject to optional redemption by the Issuer

An optional redemption feature is likely to limit the market value of the Notes. During any period when the Issuer may elect to redeem the Notes, the market value of those Notes generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period. The Issuer may be expected to redeem Notes when its cost of borrowing is lower than the interest rate on the Notes. At those times, an investor generally would not be able to re-invest the redemption proceeds at an effective interest rate as high as the interest rate on the Notes being redeemed and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.

Index-Linked and Dual Currency Notes

The Issuer may issue Notes the terms of which provide for interest or principal payable in respect of such Notes to be determined by reference to an index or formula, to changes in the prices of securities or commodities, to movements in currency exchange rates or other factors (each, a **Relevant Factor**) or with principal or interest payable in one or more currencies which may be different from the currency in which the Notes are denominated. Potential investors should be aware that:

- the market price of such Notes may be volatile;
- no interest may be payable on such Notes;
- payments of principal or interest on such Notes may occur at a different time or in a different currency than expected;
- the amount of principal payable at redemption may be less than the Nominal Amount of such Notes or even zero;
- a Relevant Factor may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices;
- if a Relevant Factor is applied to Notes in conjunction with a multiplier greater than one or contains some other leverage factor, the effect of changes in the Relevant Factor on principal or interest payable is likely to be magnified; and
- the timing of changes in a Relevant Factor may affect the actual yield to investors, even if the average level is consistent with their expectations. In general, the earlier the change in the Relevant Factor, the greater the effect on yield.

Partly-paid Notes

The Issuer may issue Notes where the issue price is payable in more than one instalment. Failure to pay any subsequent instalment could result in an investor losing all of its investment.

Notes issued at a substantial discount or premium

The market values of securities issued at a substantial discount or premium from their principal amount

tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities.

Variable Rate Notes with a multiplier or other leverage factor

Notes with variable interest rates can be volatile investments. If they are structured to include multipliers or other leverage factors, or caps or floors, or any combination of those features or other similar related features, their market values may be even more volatile than those for securities that do not include those features.

Fixed/Floating Rate Notes

Fixed/Floating Rate Notes may bear interest at a rate that the Issuer may elect to convert from a fixed rate to a floating rate, or from a floating rate to a fixed rate. The Issuer's ability to convert the interest rate will affect the secondary market and the market value of such Notes since the Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing. If the Issuer converts from a fixed rate to a floating rate, the spread on the Fixed/Floating Rate Notes may be less favourable than then prevailing spreads on comparable Floating Rate Notes tied to the same reference rate. In addition, the new floating rate may at any time be lower than the rates on other Notes. If the Issuer converts from a floating rate to a fixed rate, the fixed rate may be lower than then prevailing rates on its Notes.

Notes where denominations involve integral multiples: Individual Certificates

In relation to any issue of Notes which have denominations consisting of a minimum Specified Denomination plus one or more higher integral multiples of another smaller amount, it is possible that such Notes may be traded in amounts that are not integral multiples of such minimum Specified Denomination. In such a case a holder who, as a result of trading such amounts, holds an amount which is less than the minimum Specified Denomination in his account with the relevant clearing system at the relevant time may not receive an Individual Certificate in respect of such holding and would need to purchase a Nominal Amount of Notes such that its holding amounts to a minimum Specified Denomination.

If Individual Certificates are issued, holders should be aware that Individual Certificates which have a denomination that is not an integral multiple of the minimum Specified Denomination may be illiquid and difficult to trade.

Modification and waivers and substitution

The Conditions contain provisions for calling meetings of Noteholders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all Noteholders including Noteholders who did not attend and vote at the relevant meeting and Noteholders who voted in a manner contrary to the majority.

Regulatory approval

In granting approval for the issue of Notes, the Regulator may set out certain conditions, including the prior consent of the Regulator to an early redemption of the Notes or the repayment of amounts due in respect of the Notes following an Event of Default. There can be no assurance that the approval of the Regulator will be granted upon the occurrence of these events. Further, the Regulator has the ability to require that principal and/or interest is deferred as per Condition 9.3 (*Deferred Payment*) which may result in investors not receiving their monies on a timely basis.

Change of law

The Notes are governed by, and will be construed in accordance with, South African law in effect as at the Information Statement Date. No assurance can be given as to the impact of any possible judicial decision or change to South African law or administrative practice in South Africa after the Information Statement Date.

Legal investment considerations may restrict certain investments

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (i) the Notes are legal investments for it; (ii) the Notes can be used as collateral for various types of borrowing; and (iii) other restrictions apply to its purchase or

pledge of any Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of the Notes under any applicable risk-based capital or similar rules.

Regulatory Capital Requirement - Financial Soundness and Governance and Operational Standards

The new Insurance Act, 2017 came into effect on 1 July 2018 (the **Insurance Act**). The Insurance Act established the principle of proportionality, which means that the regulatory requirements are to be applied in a manner which is proportionate to the nature, scale and complexity of the risks inherent to the business of an insurer and insurance group. The Insurance Act provides for a number of matters to be addressed in Prudential Standards issued by the Regulator, these matters relate to financial soundness, governance, disclosure and operational matters. The Regulator has grouped the Prudential Standards into Financial Soundness Prudential Standards and Governance and Operational Standards. The Solvency Assessment Management regime, which was aimed at the protection of policyholders and beneficiaries, informed the Prudential Standards.

The Financial Soundness Standards for Insurers provide the first pillar of regulatory assurance around the capacity of insurers to meet their financial promises. The Governance and Operational Standards provide a second pillar of regulatory assurance, aimed at ensuring insurers maintain a minimum standard of sound governance and prudent business management.

Prudential Standards for Financial Soundness

An insurer must at all times maintain its business in a financially sound condition, by holding eligible own funds (capital) that are at least equal to the minimum capital requirement or solvency capital requirement, as prescribed by the Regulator, whichever is the greater. The Financial Soundness Standards sets out the high-level framework for assessing the financial soundness of South African insurers from a regulatory perspective and are designed to ensure that insurers can meet policyholder obligations by holding own funds of sufficient quality and quantity to absorb significant unforeseen losses arising from the risks associated with an insurer's activities. The Standards address matters of assessing how much eligible own funds an insurer actually holds and how much it is required to hold for regulatory purposes.

Governance and Operational Standards

The Governance and Operational Standards contain the minimum requirements for governance, from board structures through to the allocation of roles and responsibilities within an insurer. Since insurers absorb risk from the economy, it is essential they manage those risks professionally and prudently. The Governance and Operational Standards also establish the Prudential Authority's minimum requirements for an insurer's approach to risk management and control; fitness and propriety of key persons responsible for critical functions and activities within an insurer's business, and significant owners; oversight of outsourcing arrangements; controls around transfers of business from one insurer to another and other significant transactions.

Changing Regulatory and Business Landscape

The FSR Act underpins the Twin Peaks approach to regulation which is characterised by separate prudential and market conduct regulators. The FSR Act created the Prudential Authority (located at the South African Reserve Bank) which is mandated to amongst other things, promote and enhance the safety and soundness of financial institutions, and the Financial Sector Conduct Authority which is mandated to regulate market conduct in the financial sector. To support the Twin Peak approach a number of existing financial sector laws were amended (e.g. Financial Advisory and Intermediary Services Act); new financial sector laws came into effect (e.g. Insurance Act) and a number of additional financial sector laws and other legislative changes are still under development (e.g. the Conduct of Financial Institutions Act and the Financial Sector Laws Act).

In granting its approval for the issue of the Notes, the Regulator has set out certain conditions associated with the approval, including the prior consent of the Regulator to an early redemption of Notes or the repayment of amounts due in respect of the Notes following an Event of Default. There can be no assurance that the approval of the Regulator will be granted upon the occurrence of any of these events.

Risks associated with the Financial Condition of the Momentum Metropolitan Life Limited

Timely and ultimate payment of principal and interest on the Notes depends on the financial condition of the Issuer. The financial condition of the Issuer may be affected by many business and operational factors, including but not limited to legislative or regulatory changes such as new prudential requirements, industry wide issues, market conditions or investor confidence, as well as issues specific to the ***Momentum Metropolitan Life Limited*** such as mortality experience on its portfolio, investment return below expectation, its cost base and the sentiments of policyholders and distributions following management actions. Other risks, as highlighted in “*Description of Momentum Metropolitan Life Limited*” can also affect the timely payment of interest and principal.

Risks Relating to the Issuer’s Business

Risks affecting the business of the Issuer are set out in the section of this Information Statement headed “*Description of Momentum Metropolitan Life Limited*”.

To achieve this result, the business makes a number of multi-asset portfolios available to its clients, blending both local and international asset classes. In general, where scale and efficiency are benefits, the capability is manufactured within the team (e.g. fixed income and passives). Where different styles outperform over different periods and there are capacity constraints, management tends to be outsourced (such as equities). For the retail market, these investment solutions are offered on its local and offshore platforms with a number of different pooling structures to ensure efficient delivery. The core driver of revenue is the ability to attract assets onto various platforms and to ensure that, as appropriate, they are invested in internal investment solutions.

4. RISK MANAGEMENT

Introduction

The Issuer's risk philosophy recognises that managing risk is an integral part of generating shareholder value and enhancing stakeholder interests. It also recognises that an appropriate balance should be struck between entrepreneurial endeavour and sound risk management practice.

The Issuer's key risk management strategies are to:

- Understand the nature of the risks the Issuer is exposed to, the range of outcomes under different scenarios, and the capital required for assuming these risks.
- Manage shareholder value by generating a long-term sustainable return on the capital required to back the risks assumed.
- Ensure the protection of client interests by maintaining adequate solvency levels.
- Ensure that capital and resources are strategically focused on activities that generate the greatest value on a risk-adjusted basis.
- Create a competitive long-term advantage in the management of the business with greater responsibility to all stakeholders.

As at the Information Statement Date, the Issuer actively manages the following risk categories and types of risk:
